ASHRAE 36 Readiness Checklist

Reimagining Building Automation with Smarter Sequences

Use this checklist to assess your readiness to implement ASHRAE Guideline 36 and unlock smarter, more efficient building operations.

Understanding ASHRAE 36

- ☐ Have you reviewed the core principles of ASHRAE Guideline 36?
- ☐ Do you understand how standardized sequences improve building performance KPIs *(i.e. energy efficiency, occupant comfort, fault detection)*?
- ☐ Are you aware of the differences between traditional control sequences and ASHRAE 36 sequences?

Strategy & Planning

- ☐ Have you identified which buildings or systems are candidates for ASHRAE 36 implementation?
- ☐ Have you set measurable goals for performance improvements *(e.g., energy savings, reduced maintenance)*?
- ☐ Is your team aligned on the benefits and requirements of ASHRAE 36?
- ☐ Do you know your local code requirements?

BAS System Capabilities

- ☐ Does your current BAS support modular, scalable, and standards-based control sequences?
- ☐ Can your BAS software easily integrate ASHRAE 36 sequences without extensive custom programming?
- ☐ Does your BAS provide built-in analytics and reporting to track KPIs aligned with ASHRAE 36?

Legacy System Considerations

- ☐ Is your current BAS based on legacy hardware?
- ☐ Have you assessed whether your existing controllers and supervisory engines can support the memory and processing demands of ASHRAE 36 sequences?
- ☐ Have you considered a modernization path to enable ASHRAE 36 compatibility?

***Tip:** Our BAS platform simplifies ASHRAE 36 adoption by offering pre-configured sequences, intuitive tools, and real-time dashboards. We also support modernization paths, including financing support, to ensure your systems are ready for G36.*

Data & Performance Monitoring

- ☐ Are your sensors and devices calibrated and capable of providing the data required by ASHRAE 36 sequences?
- ☐ Do you have a centralized platform for monitoring system performance and identifying faults?
- ☐ Can you generate reports that demonstrate compliance and performance improvements?

Training & Support

- ☐ Has your team received training on ASHRAE 36 and its implementation?
- ☐ Do you have access to technical support or consulting services for ASHRAE 36 deployment?
- ☐ Are you leveraging vendor resources to accelerate readiness?

Next Steps

- ☐ Schedule a readiness evaluation with our team
- ☐ Request a legacy system evaluation to determine upgrade needs for ASHRAE 36 compatibility
- ☐ Explore our ASHRAE 36-ready BAS solutions
- ☐ Join our upcoming webinars and training sessions
